*Uvedené hodnoty sú orientačné nakoľko technické normy sa v jednotlivých krajinách líšia. Pri návrhu zábradlia je potrebné zohľadniť aj ďalšie faktory ako je veterná zóna, účel stavby, hĺbka prepadu, kotvenie stĺpika, typ stĺpika (test zaťaženia)…

*The values given are just informative because the technical standards vary from country to country. When designing railings, other factors have to be taken in consideration such as wind zone, purpose of construction, depth of overflow, post anchorage, post railing type (load test)…
